<2.0 mcg/mL		<2.0 mcg/mL	
Cranberry IgG	Y165	Raspberry IgG	Y165
<2.0 mcg/mL		<2.0 mcg/mL	
Grape IgG	Y165	Strawberry IgG	Y165
<2.0 mcg/mL		<2.0 mcg/mL	
Grapefruit IgG	Y165	Reference ranges have not been established for food-specific IgG tests. The clinical utility of food-specific IgG tests has not been established. These tests can be used in special clinical situations to select foods for evaluation by diet elimination and challenge in patients who have food-related complaints. It should be recognized that the presence of food-specific IgG alone cannot be taken as evidence of food allergy and only indicates immunologic sensitization by the food allergen in question. This test should only be ordered by physicians who recognize the limitations of the test. *This test was developed and its performance characteristics determined by Eurofins Viracor. It has not been cleared or approved by the U.S. Food and Drug Administration.	
Lemon IgG	Y165	Received: 11 Feb 2021 09:38	Reported: 11 Feb 2021 16:42
<2.0 mcg/mL			
Orange IgG	Y165
