von Willebrand Factor Ag, P

Result Name	Value	Unit	Reference Value	Performing Site
von Willebrand Factor Ag, P	55	%	55–200	1 MCR
Note: Apparently normal individuals of blood group "O" may have somewhat lower Factor VIII and von Willebrand factor (VWF) than individuals of other blood groups, such that (for example) those of group "O" may have VWF antigen as low as 40–50%, whereas normals of nongroup "O" generally have VWF antigen above 60–70%. Suggest clinical correlation.
